Evening and Weekend News

"Each Student is a unique person and powerful learner capable of great achievement. I truly marvel at my students' capacity for learning, accomplishment, and growth."

Michelle Forman, American National Teacher of the Year 2001

Dear Families and children,

You may notice that Just Plane Kids uses curriculum in all content and developmental areas as a flexible framework for teaching and support the development of children's learning experiences. We do our best to create meaningful experiences that engage all children in purposeful and meaningful learning related to their developmental areas. Teachers ask open ended question to stimulate their thinking, and they are free to express their ideas and encourage building on the meaning of their experiences.

As we all know and understand that in the early childhood things does not work as they plan. Therefore we try to adjust challenges as they gain competence and understanding during the time children are learning new skills. Teaching staff is there to facilitate each child's learning into meaningful and achievable by responding to their needs and interest.

I would like to encourage you to work with your child at regular bases to pose problem, ask question to your child regard the problem and stimulate their thinking. That will help child/ren to express their ideas to resolve their problem best of their understanding.

Please feel free to talk to me at any time with your concerns or feedback.

Kamaljit Kaur MBA (Director of Just Plane Kids)

Teddy Bear Tale

Teddy bears will be working on sensory activities, they will participate in planting our spring flowers by doing that, children will learn how plants grow and what they need to grow. These activities will enrich their vocabulary as well their social emotional, cognitive and small motor skills. Children will be introduced to picture books related to living things such as plants and animals. Children will explore all kinds of animals such as farm animals, wild animals and insects.

We will provide hands on experiences and a variety of sensory materials, such as helping digging to plant our flowers, watering the plants, painting, exploring sand, water and ice.

We would also like to remind you to check your child's folder on a daily basis, and take their work home.

Kindergarten

As we enter our 3rd trimester of the school year, we come to the realization that our school year is coming to an end. This final trimester, we will be involved in very intense learning to ensure we are ready for first grade. In language arts we will begin learning about vowels and consonants and the roles they play in writing. For mathematics, our area of focus will be measurement and geometry. The children will be involved in hands-on math experiences that will help children comprehend measurement and geometric concepts. We will also begin our performance arts unit for Art. We will create and perform various theatrical plays based on our favorite books or topics we have learned.

Finally, science will include an in depth study of life science. Field trips will be scheduled through the remainder of the school year to correlate with our earth science topics.

Debbie Garcia and Margarita Sierra

Brown Bear Greetings

We are more than half way through our school year and the Brown Bear Class is moving forward in ways we could never imagine. We will be unleashing new themes and moving forward in our planned curriculum. In the next few months we will have continued focus in the areas of Language, Creative Art, Science and Mathematics. Through classroom activities and field trips each child will be progressing in the areas of Social and emotional development, Physical development, Cognitive development and, language development.

In the month of April will be exploring spring and all that spring has offers everything from planting, seeds, flowers, rain, and rainbows. We will be doing this by implementing our garden and the outdoor classroom into ever lesson. We will be investigating the process of planting by doing it hands on. We will begin planting new fruits and vegetables in our garden and working hands on with their growth process. We will also be exploring insects and bugs and how they affect our gardens growing process. In the month of May we will be learning about different animals and their habitats we will be taking trips to the feline reservation in Rosamond to see these animals in their natural habitat.

We will also have continued focus rhyming, colors, letters, numbers, shapes, and opposite words. The month of June we will begin our Kindergarten transition we will begin taking trips to local schools and touring their Kindergarten classrooms allowing for our Brown Bear Students to see their future classrooms first hands. We will also continue our readiness for Kindergarten curriculum. We will have continued focus on Ocean Animals our telephone numbers and addresses. The month of June will also hold the Brown Bear Promotion Ceremony.

Brown Bear Teachers

The Busy Bee Buzz

Busy Bee Parents,

During this time Busy Bees we will focus on our Social Developmental skills, a sense of self with learning how to show ability to adjust to new situations and settings. Our goals and objectives are to create a curriculum and enhance a social-emotional, physical and cognitive growth through a variety of play experiences with cooperative play. Example: Circle Time, Meal Time, Outdoor Activities, and Language Developmental Skills.

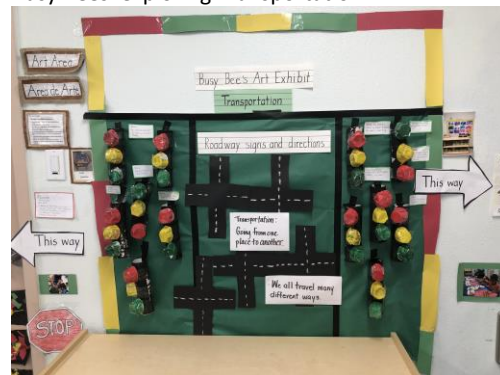

Children will learn how to become independent as they function in classroom daily with positive words. Example: Please – Thank You – Excuse Me. These words will help with social language-skills while they interact with their peers. Busy Bees will experience a way of understanding how to use their words for expression of them-self through play. We will also learn how to take turns and share with one another during playtime.

Also feel free to volunteer in the classroom at your convenience.

If you have any questions, feel free to ask any time and thank you all for your continuous support.

“Your child and Cell Phone”

When you come to pick up your child/ren from their classroom, they are happy to see you! They were looking for this moment since you drop them off at the child care. But some time their hopes are crushed when are on your cell phone, instead of giving them your undivided attention.

So I am requesting you as a mother that when you come to pick up your child/ren, at that time not to have your phone on. So you can spend that priceless moment with your child/ren.

Melissa Garsell

Dolphin Highlights

Just Plane Kids provides a fun, safe and educational program for before and after school care program for all children. Children spend time with their friends and participate in structured activities designed to meet their interest and skills. We understand that after being in school all day, they need sufficient and ample space for a variety of activities. We are fully prepared to provide children with these needs and activities.

In our Dolphin program children have one on one help available for their homework or any project they may have or need help with. We would like you to encourage all of you to encourage your child to do their daily assignment at the center.

We also would like to notify you that summer program will be starting on June 12, 2017. So please check with front desk to enroll your child in the summer program.

Kindergarten leaning about Systematic and Non systematic measurement

Evening and Weekend

We have fun-filled activities set for your children every evening and weekend. On the weekend we always have child-initiated art activities that are open-ended and process oriented. So they can express their unique thoughts and creative expressions.

We are requesting you all to call in 24 in advance to give us your child's weekend schedule, so we can meet their developmental need appropriately.
